# OUR WHY

Today, our instincts are driven by digital platforms and media, this life has distanced us from our artistic sensitivity.

Music Box is a return to the times where art was made with our hands, the times of musicians, craftsman and the poets.

Our intention is to reconcile elements that today do not coexist, achieving a shared reality between the performing arts, architecture and sound, creating moments that feel real...

WE ARE A COLLECTIVE OF CULTURAL ADMIRERS AND SENSORY SEEKERS, PASSIONATE ABOUT INNOVATING THE TRADITIONAL.

# FUTURE EVENTS

# MUNAL

**A night of chamber music at the National Museum of Art**

**A cello ensemble and guest artists immerse us in a sound journey through the music of Fil Uno, a contemporary composer who blurs the boundaries between pop and classical music with emotional panoramas that range from tenderness to ecstasy. A fascinating architecture to celebrate a performance of contemporary music making each spectator a key element in the making of magic.**

# FIL UNO

Fil, has led to a territory of experimentation as an instrumentalist and composer to a new dimension, both as a performer of baroque music, and in the field of experimental cello.

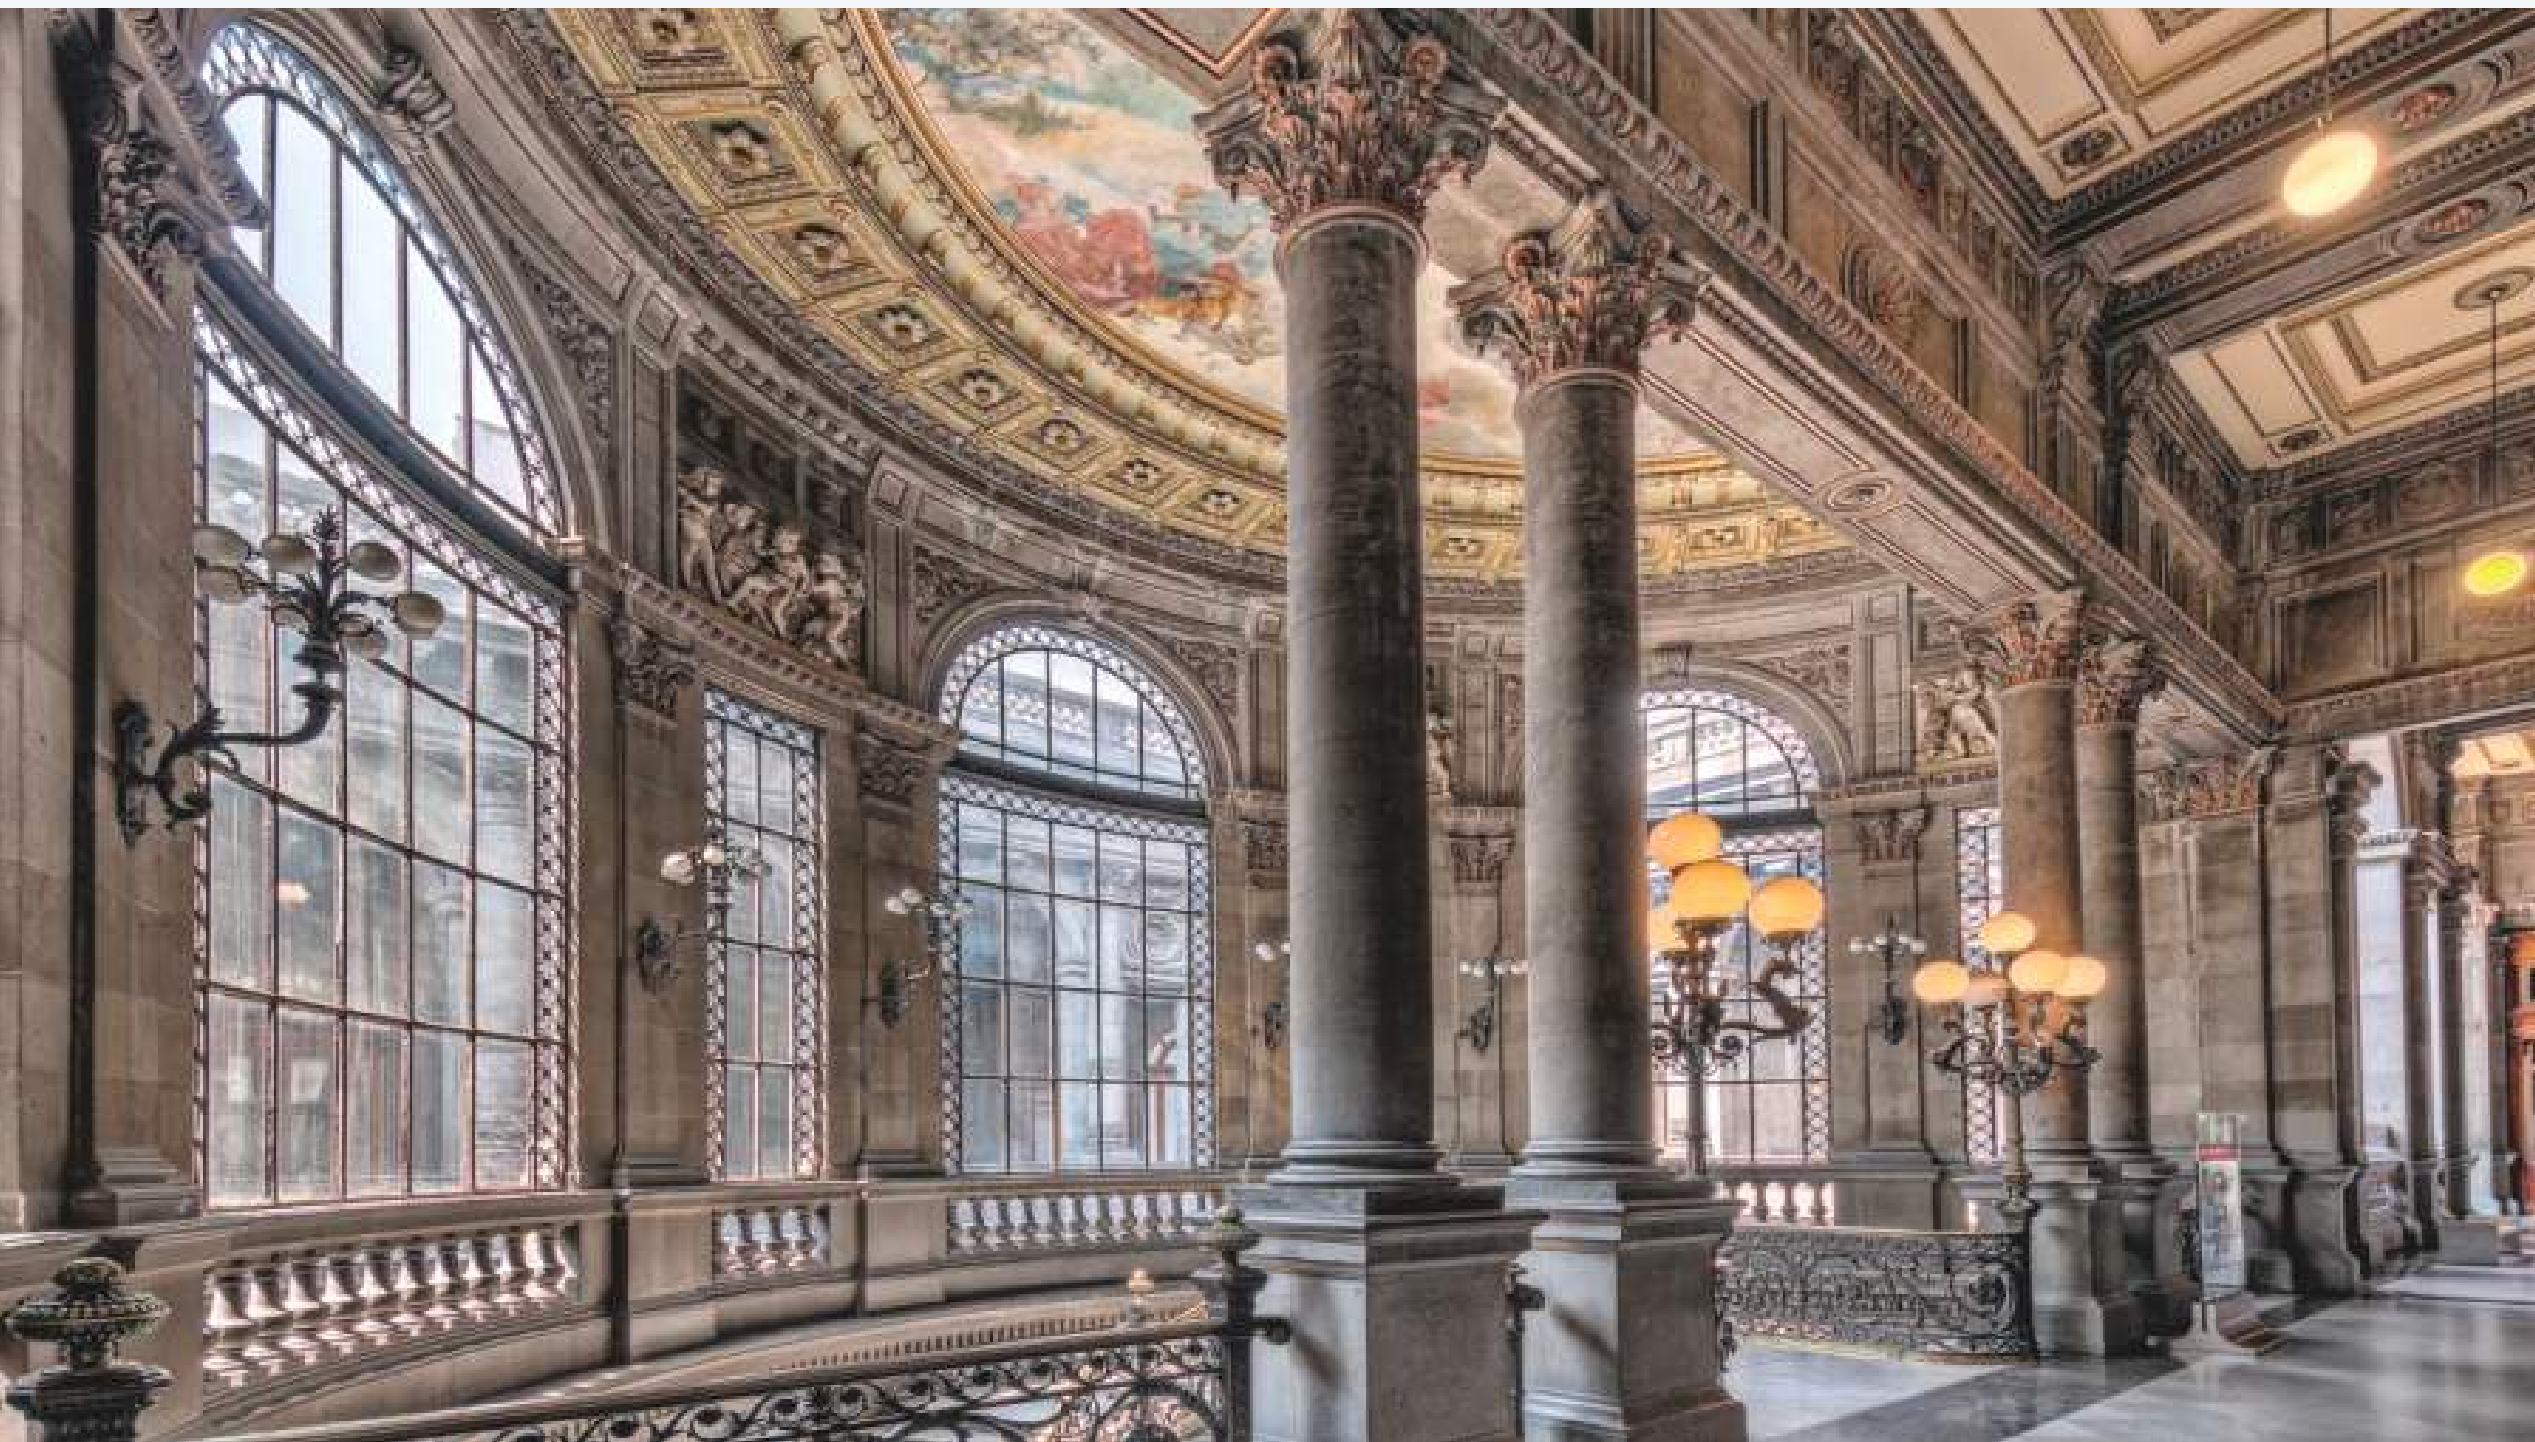

He devotes himself to what we could call a technical/intuitive investigation of the physical foundations and the expansion of possibilities of the instrument with in which he has chosen to express his vision of music.

CELISTA

# CASTLE GALA

We meet in the historic Chapultepec Castle, the guests dress up, on a night to remember with nostalgia, elevating our senses through music.

The orchestra wears a tuxedo, and long dresses. A very special program pays tribute to the end of the year, which is performed in a contemporary classical concert, with authors such as Max Richter, Neils Fram and the London Electronic Orchestra, the evening takes listeners to experience the magic of fashion among its participants in the only castle in Latin America, enjoying a night of orchestra and modernity.
